The ship, Provincia by name, took in a cargo of that sweet at several North Java ports. After being out at sea for a few days, she put in at Batavia with her cargo damaged and in a fluid state, though the vessel had not met with bad weather on the way. The question how the cargo became fluid baffled every expert there, and the Master stood out that the damage must have been self-originated, and hence that he could not be held answerable. The shippers and the insurance company concerned thought otherwise with the result that the case came into Court in London. The judgment just delivered has gone against the vessel, the damages being laid at about one hundred thousand guilders.

THE COLLISION.

The cross-action between the China Merchants S. N. Co. and the P. and O. S. N. Co., in respect to the collision between the Ancona and the Kunghai, was continued.—Mr. H. V. Drummond (instructed by Messrs, Wolton and Deacon) appeared for the first-named Company, and Mr. Francis, Q.C., with Mr. Pollock (instructed by Messrs Johnson, Stokes, and Master) represented the other side.

John Whyte Boyd, superintendent engineer at Kowloon Dock, said:—I live at the Dock. the morning of the 4th December, I heard two short blasts of a steamer's whistle. After it I heard one long blast. Then I went on my verandab to see what was the matter. I saw two junks right in the way of the Ancona. I also saw a small steamer close to Quarry Bay. found out afterwards that she was the Kungbai While standing on verandah watching the junks and Ancona I observed the small steamer porting coming towards the Ancona. The Ancona came round to starboard. I mean her head went round to port. That, was after the other steamer had ported. The Kungpai went right on and struck the Ancona. I saw the two vessels together. Under the above heading "O.M.P." writes to our Shanghai morning contemporary under date March 28th :- Mr. Clement Allen, in his last year's Report to the Foreign Office on the Tea Trade at Hankow, quotes largely from a letter which had appeared in your columns, from one whom he styles "A Pessimist Merchant of Shanghai," The season's prospects as there foreshadowed were gloomy and unfavourable, but the bad results both to native middlemen and to foreign exporters have far exceeded the gloomiest anticipations. The losses in many instances are almost past belief, and as many the concurrence of his co-directors. He said: - | sales reported from London lately show a drop The work is progressing with all possible des- of from 33 to 47 per cent, on prices realised for patch, and I do not think the cost of the terrace | counterparts early in the season, the winding up of this season promises to beat the record of bad allowance had been made for interest on money. same character as the second. We are promised a better crop this year; that is to say, proclamations have been issued by the tricts prohibiting the use of anything except charcoal in the firing processes. It these proclamations are effective a grand step in the right direction will have been taken, as so much depends upon the material used for the firing, and most of the objectionable flavours will be climit nated. The high prices obtained for really fine teas last year are likely to induce early picking in more districts, but of course in the end the quality depends entirely on the state of the weather during the picking time, as no improvement is spoken of in the facilities for housing

It is rumoured that only four steamers will load teas in Hankow for London this season. It would be better if none went there to load, and that steamers should be despatched from Shanghai on fixed dates with part cargoes only. This sounds retrogressive, but if the Chinese will not keep level with other producing countries either in quality of their leas or by reducing their tariff and giving a cheap article, we must look for retrogression, if not extinction. It is a sad comment on the trade that four steamers should be now considered enough; whereas fi een were at one time not thought too many.

There is very little doubt that as far as English buyers are a neerned the business this year will be a dragging one, and much of the first crop tens will have to be held by the Chinese and brought down to Shanghai for sale. It would be a great boon to many teamen if they were allow-d to bring down their teas in bond, and pay duty in Shanghai at the time of export. At present it necessitates obtaining an advance of which interest has to be paid, of 30 per cent. to 50 per cent, of the value of a good deal of the tea which comes to Shanghai for sale before it can be forwarded, and this prevents much tea being sent down which would otherwise find its way to this market. This would probably have the double effect of encouraging the use of the bonded system, as well as of bringing the tea trade back to Shanghai.

The stock of China Congou in London on Isl June next will be at least 30,000,000 pounds, or six month's supply at the present rate of deliveries for England and the Continent.

MESSAGE FORM GEORGE JAMES GOSTLING, L.D.S., R.C.S.I., Ph.C.I., Licentiate in Pharmacy and Dental Surgeon.

Stowmarket, July 18, 1889. TO MR. WHITE.

be printed and circulated in Suffolk. The statement was entirely voluntary, and is genuine in fact and detail.

"To the Propiletors of Mother Seigel's Syrup. "GENTLEMEN,—The following remarkable cure was related to me by the husband. Mary Ann Spink, of Finborough, Suffolk, was for over twenty years afflicted with sheumatism and neuralgia, and alth ugh comparatively a young woman at the time she was attacked (she is now fifty), she was compelled, in consequence, to walk with two sticks, and even then, with difficulty and pain. About a year and a bail ago she was advised to try Mother Beigel's Syrup, and after taking three bottles and two boxes of Seigel's Operating Pills, the use of her limbs were restored, and she is now abic

to walk three miles to Stowmarket with case, frequently doing the distance in three-quarters of an hour., Any sufferer who doubts this story can fully ascertain its truthfulness by paying a visit to the village and enquiring of the villagers, who will certify to the facts.

"Appended is the husband's signature to the "(R. Spink.)

"G. J. GOSTLING, "Inswich Street, " Stowmarket."

This is certainly a very pitiable case, and the happy cure wrought by this simple but powerfu! remedy, must move the sympathy of all hearts in a common pleasure. This poor woman had been a cripple for twenty of her best years; years in which she should have had such comfort and enjoyment as life has to give. But, on the contrary, she was a miserable burden to herself and a source of care to her friends. Now, at at an age when the rest of us are growing feeble. she, in a manner, renews her vouth and almost begins a new existence. What a blessing and what a wonder it is! No one wh knows her, or who reads her story, but will be thankful that the good Lord has enabled men to discover a remedy capable of bringing about a cure that reminds us—we speak it reverently—

of the age of miracles. It should be explained that this most remarkable cure is due to the fact that rheumatism is a disease of the blood. Indigestion, constipation, and dyspepsia cause the poison from the partially digested food to enter the circulation, and the blood deposits it in the joints and muscles. This is rheumatism. Seigel's Syrup correct the digesttion, and so stops the further formation and deposit of the poison. It then removes from the system the poison already there. It is not a cure-all. It does its wonderful work entirely by its mysterious action upon the digestive organs. But when we remember that nine-tenths of our ailments arise in those organs, we can understand why Seigel's Syrup cures so many disease s that appear to be so different in their nature. In other words rheumatism and neuralgia are but symptoms of indigestion, constipation, and dyspepsia.-[Advi.

SCOTT'S Emulsion of Pure Cod Liver Oil with Hypophosphites acts both as food and medicine. It not only gives flesh and strength by virtue cf its own nutritious properties, but creates an appetite for food that buil's up the wasted body Read the following: " Scott's Emulsion is in my opinion an excellent and valuable compound. I have given it to consumptive patients and have been delighted with the results obtained. It is pleasant to the taste and can be borne by the most sensitive stomach."- E. A. ABRIDGED PROSPECTUS. THE objects of the Company are to acquire the property and take over the business of the East Borneo Planting Company, Limited, as a going concern, and to plant and grow tobacco, pepper, &c., on their Estate (called the Melapi Estate) consisting of 10,0 o selected acres of land on the now well known Kinabatangan

River, British North Borneo. The East Borneo Planting Company, Limited commenced clearing in the Autumn of 1888, and have been working their Estate to the present time. The result of the working for the year 1880 has been a crop of tobacco of the required quality as regards both size and texture of leaf, and samples have been valued by experts in London at 2/6 to 3/- per lb. and reported on in Amsterdam as of excellent quality, but the Capital of the Company has been found insufficient for the requirements of the enterprise. It has therefore been determined that the East Borneo Planting Company, Limited, shall be reconstituted, and the present Company has been

formed for the purpose. The Capital of the East Borneo Planting Company, Limited, is \$200,000, divided into 4 000 shares of \$50 each fully paid up, and the consideration to be paid to the Shareholders in that Company is the same amount in 20,000 fully paid up shares in the present Company." The remaining 20,000 shares to be offered for subscription in terms of this prospectus and to be available for the further devolopment of the

The work which has been done on the Estate is as follows: A Manager's house and Assistants house have been built, also coolie sheds and and drying and fermenting sheds. Roads have been cut, drains made and jungle cleared for planting 150 fields for 1890. There is also a Pepper Plantation on which between \$4,000 to \$5,000 has been expended and the prospects of which are good. The whole is in full working order, there is an ample supply of Chinese

The cash balance of the old Company and the proceeds of the Sale of the 1889 crop, which goes to Europe about May next being taken over as part of the assets, the Directors have good reason to believe that there will be nearly sufficient funds to work the crop of 1800 and that in any event it will not cost the present Company more than \$30,000. This crop, with the present organised labour force, may reasonably be expected to yield from 6 to 8 piculs a field, or an estimated value of \$100,000 to \$130,000. In good years the average yield per field may be considerably higher. The Ranow Estate British North Borneo has produced to

piculs a fi ld, The results to be obtained from the first year's working of this Company with 18 months labour already done on the Estate may be reasonably

expected to be as follows :--150 fields @ say 7 piculs a field=1,050 piculs or 140,000 hs, @ 2/6 per h = £17,500 or @ 3/1 == \$113,513.58 Deduct for charges, shipping
